

INFORMATION TECHNOLOGY PROJECT MANAGEMENT MODULE

DURATION: 39 hours

PROGRAM OBJECTIVE

This course presents an understandable, integrated view of the many concepts skills, tools, and techniques involved in project management and helps in preparing for the vendor neutral Project+ certification. It provides up-to-date information on how good project management and effective use of software can help you manage projects, especially information technology projects. Information Technology Project Management, covers all nine project management knowledge areas—project integration, scope, time, cost, quality, human resource, communications, risk, and procurement management—and all five process groups—initiating, planning, executing, monitoring and controlling, and closing—to information technology projects.
